

**See audit  
through a  
new lens**

---

Dear Auditor,

Imagine a world where you could see how you were doing, from risks to controls, compliance to ERM, all integrated in a simple, intuitive way?

It's time for a new way to see audit. A new perspective, if you will. Introducing AuditBoard. What was once SOXHUB is now a fully integrated platform. To learn more, visit [www.auditboard.com](http://www.auditboard.com).

We've included a gift we think will come in handy: a 3-in-1 Universal Photo Lens Kit, to get you started.

Join the Audit Revolution.

- The AuditBoard Team

# Revolutions begin with a new perspective

---

Here are three to start with. Your lens is compatible with any device you can imagine. Get great shots with your smartphone, tablet or laptop.

**Fisheye Lens:** See the world in 180 degrees

AuditBoard's dashboards give you the big picture overview, so you can know where you're at with your testing at any time.

**Wide-Angle Lens:** Get the perfect scenic shot

AuditBoard gives you confidence and control over your entire audit universe: risks, controls, compliance, ERM, and everything in between.

**Macro Lens:** Beauty is in the details

It's true for AuditBoard too - detailed audit trails, version history, and role-based permissions, to name a few.
